Skills

Data Analytics Languages/Tools: SQL, R, Python, Hive, Impala
Business Intelligence and ETL Tools: Tableau, Power BI, Google Data Studio, MS Excel, Trino, Apache Spark, Tableau Prep, Alteryx, Dataiku, Adobe Analytics, Google Analytics, Teradata, Microsoft Azure, Snowflake
People Management & Leadership: Mentoring and Coaching, Resource Allocation, Setting goals & performance expectations, Conflict Resolution, Interviewing candidates, Stakeholder management

Experience

Morgan Stanley, Baltimore, MD, USA – *Director, Data Analytics* *November 2024 – Present*

- Led a team of three analysts in designing audit intelligence dashboards that identify high-risk areas across IT audits by analyzing vulnerabilities and risk domains - reducing manual effort by 30+ hours per month.
- Built and automated scalable data pipelines using SQL, Python, and Dataiku recipes, improved data quality, and ensured timely delivery across all stages of the Internal Audit lifecycle.
- Supported end-to-end Key Business Services audits by developing a Continuous Monitoring Dashboard in Tableau that delivers real-time insights into operational risks, asset performance, and capacity breaches.
- Built AI agents using Copilot to automatically scrape and ingest competitor vendor outage data into Hive tables, enhancing Vendor Performance, Benchmarking, & Backup (Transference) Tableau dashboards.
- Launched BI development lifecycle standardization initiative - including requirements gathering, data acquisition, dashboard design, UAT, and QC - resulting in consistency, reduced rework, and faster delivery.
- Designed and executed an A/B test comparing the existing risk model (v1) with an enhanced model (v2) incorporating system criticality, breach likelihood, and audit history, reclassifying of 17% of audits into correct risk tiers and improving audit scoping and resource allocation.

TikTok, Washington, D.C., USA – *Lead Data Analyst* *August 2024 – November 2024*

- Built GET APIs using Python to retrieve data from Vectr via a third-party gateway, integrating over 100k records monthly into a Hive table supporting Data Protection and Access Control dashboards.
- Led the design and deployment phases of a MITRE ATT&CK framework dashboard in Aeolus (an internal, Tableau-like tool), capturing attack tactics/phases, techniques, and sub-techniques to support vulnerability and effort tracking for stakeholders from Red and Purple team with row and column level security.
- Enabled Purple and Red Teams to boost threat resilience by over 10% through improved visibility and control testing within simulated attack scenarios.

Blend, Columbia, MD, USA – *Senior Business Intelligence Analyst* *January 2021 – August 2024*

- **Hospitality Industry (Marriott International):**
  - Engineered Adobe Analytics and Tableau dashboards to monitor Marriott website and Marriott Bonvoy app performance driving a consistent increase in conversion rates going up from 4% to 6.9%.
  - Leveraged SQL (Snowflake) to construct purchase funnels and conduct customer email journey analysis, increased personalization, leading to 10% improvement in customer engagement metrics and 4% increase in revenue.
  - Led a team of 5 who owned reporting solutions for Mobile Key, Web & App Check-ins, Kiosks, Digital Upsell etc. leading to 15% improvement in guest experience and 25% increase in product adoption.
- **Social Media Industry (LinkedIn):**
  - Developed an employee hierarchy and sales performance tracking system via Tableau dashboard with robust row-level security protocols, resulting in a 20% increase in managerial efficiency.
  - Spearheaded the automation of data cleansing, transformation, and integration procedures through an in-house tool, leading to a 30% reduction in manual errors and a 10% boost in operational efficiency.
- **Retail Industry (Brooks Brothers):**

    - Developed target demographic analysis for holiday marketing campaigns using SQL and Tableau, contributed to a 5% increase in profitability and an 11% improvement in customer retention, generated actionable insights on Revenue, Profit, Total Orders, and Average Order Value (AOV).
- **Retail Industry (Consumer Reports):**
    - Developed performance comparison dashboards for retail products like stick and robotic vacuum cleaners, refrigerators, etc., enabling companies to benchmark their products against competitors (published on client websites and in magazines).
- **Blend Internal**
    - Expedited new hire onboarding by developing coursework, standardizing processes, and conducting training on client communication and SQL and Tableau best practices to improve team capabilities.
    - Won the Annual Comradery Award at Blend in 2023.

CVS HEALTH, Woonsocket, RI, USA - *Data Analyst* *October 2019 - December 2020*

- Developed Patient Behavior Tracking Tableau dashboards pulling data using Teradata SQL, driving adherence to medications and prescribers, adding 300k prescriptions via SMS, IVR, and Point of Sale (POS) marketing strategies.
- Identified test and control groups and established KPIs - including fill rate, pickup rate, and patient adherence; optimized A/B testing and campaign launch strategy, driving a 40% increase in prescriptions.

Even & Odd Minds, Philadelphia, PA, USA - *Business Data Analyst* *September 2018 - August 2019*

- Documented business requirements and utilized SQL and Tableau dashboard to uncover quarterly trends for online legal copyright infringements and complaints to identify factors influencing resolved and pending complaints. Recommended strategies to expedite the identification of flagged URLs, saving 15% time.

Thomson Reuters, Eagan, MN, USA - *Business Data Analyst* *May 2018 - August 2018*

- Identified recurring trends in causes, sub-causes, affected business services, vendor outages, etc., using Tableau and SQL, enhancing proactive decision-making to meet 20% more SLAs.

Education

University of Maryland, College Park, MD, USA - *MS in Information Systems* *August 2017 - December 2018*

Indraprastha University, India - *Electronics and Communications Engineering* *August 2013 - June 2017*

Extracurricular & Volunteering

- Delivered a BI Development Lifecycle lecture at the University of Maryland's Robert H. Smith School of Business for Master's students in Business Analytics and Information Systems.
- Volunteered at Baltimore Animal Rescue and Care Shelter (BARCS), supporting animal intake, enrichment, and adoption events.
- Organized pickleball tournaments at work to promote team building, culture, and cross-team collaboration.
